PROFESSIONAL OBJECTIVE

I quickly adapt to new backend technologies and strive for excellence in every project. In my free time, I explore new tools and frameworks to expand my knowledge. Beyond Python Django, I have independently mastered essential backend technologies, allowing me to build scalable and efficient systems. Since 2022, I have been enhancing my skills through self-directed learning, focusing on creating well-structured, high-performing, and minimalist solutions.

TECHNOLOGIES

■ Programming languages

- python
- C

■ Databases

- PostgreSQL
- MySQL
- SQL Server

■ Frameworks and Libraries

- Django
- Django Rest Framework

■ Services and Tools

- Linux
- Nginx
- Gunicorn
- Digital ocean
- Docker

EDUCATION

NATIONAL UNIVERSITY OF UZBEKISTAN NAMED AFTER MIRZO ULUG'BEK - BACHELOR

2021 - 2025

- Applied Mathematics and Intelligent Technologies, Faculty
- Information Systems and Technologies (by Networks and Sectors)

COURSES

NAJOT TA'LIM

2023 - 2024

- I learned the basics of C, MySQL, and Python in the Foundation course.
- In the Python Django course, I learned Django, Django REST frameworks, Nginx and Gunicorn.

LANGUAGES

- Uzbek - Native
- English - Intermediate
- Russian - basic

PROJECTS

Devsearch - (November, 2024)

The goal of this project is to create a platform where developers can come together and showcase their projects in one place.

Technologies Used: Python, Django, HTML, CSS, Bootstrap, Nginx, Gunicorn, OAuth, smtplib, and PostgreSQL.

The rest of my projects are hosted on my [GitHub account](#).

SKILLS

- Teamwork
- Endurance
- Sociability
- Honesty
- Punctuality
- Stress resistance
